

KEEP PASSENGERS INFORMED & ENTERTAINED

The Club CMS from Flight Display Systems is designed as a retrofit package for light to mid-cabin aircraft. New technology enables passengers of any size aircraft to enjoy an ultimate entertainment package during flight. An intuitive design makes the entire system easy to operate and fun for everyone.

- Affordably Priced Complete Cabin Management System.
- Control Audio and Video from Each Seat in the Aircraft.
- Share Your iPod, iPhone, and iPad During Flight or play DVD movies.
- Worldwide Satellite Maps and Free Company Logo.

WORLDWIDE MOVING MAP

FD200CPU

Provides real-time flight information including position, altitude, destination, speed, and time enroute. Data pages are available in six different languages and in metric or standard units. Worldwide NASA satellite imagery and 1,000,000+ global cities and points of interest. Free company logo.

7" WIDESCREEN LCD ON ARM MOUNT

FD70ARM-QR

View movies and the Moving Map on this bright 7" LCD monitor. Featuring new backlight technology to reduce weight and heat. New aesthetically designed curved enclosure in textured beige color looks like OEM installation. Basic package includes two monitors (seven maximum). Upgrade to 10.2" arm monitors optional.

CABIN CONTROL MODULE

FDCCMI-A

Select up to 12 audio channels using this single-button switch at each seat. Easy and intuitive, with full-color icons showing on the bright OLED screen. Includes a 1/8" headphone jack and volume adjustment buttons. Four FDCCMI-A OLED switches included. Add up to four additional switches (eight maximum).

IPOD ADAPTER CABLES OR DVD PLAYER

FDMEDPLR-3QR or FD932DVD-LP

Power and share your iPod, iPhone, and iPad with other passengers. Removable cable connects to aircraft and device (iPod or DVD). Arrive with device charged rather than drained. Play DVD video or CDs. Choose any combination of these two devices to best suit your needs.

6 CHANNEL GENRE MUSIC PLAYER

FDACS-LP

Provides up to 90 hours of entertainment. Six independent memory cards hold up to 15 hours of MP3 music. Select six genres such as Rock, Classical, Country, Jazz, Oldies, or Blues. Load all of your favorite music! Each card can be programmed by the user for different genres of music simultaneously broadcast throughout the cabin.
