## BLU-RAY DVD PLAY

BACK

FD932DVD-BLU

## FEATURES

First Blu-ray high-definition (HD) disc player for aircraft that brings you one step closer to home. HD movies are now in-flight at an altitude near you

- Compact size and a replacement for existing DVD player
- Provides the flexibility to watch movies in DVD format or Blu-ray HD format
- You can upgrade to the Blu-ray player even if you do not upgrade the aircraft's displays to HD
- Unique capability to output HD and composite video simultaneously
- Upconvert standard DVD video to 1080p thru HDMI
- Plays audio CDs, CD-R, CD-RW
- Plays Blu-ray high-definition discs at up to 1080p resolution through the HDMI output

- Unit interfaces directly to the Flight Display Systems Cabin Management System (CMS) to control playback functions
- Includes IR remote control
- Outputs: HDMI video, composite video, and stereo audio output
- Control playback functions with the IR remote control or RS-485 data bus interface

### NOTE:

- Blu-ray HD video playback through HDMI requires an HDCP compatible monitor
